INTRODUCTION

1. At the third session of the Intergovernmental Group on Transfer of Technology, held in Geneva from 15 to 26 July 1974, interest was expressed in a bibliography on the subject of transfer of technology. [1] Since that time, the number of studies prepared in UNCTAD has grown considerably. This bibliography provides details of studies and other documents on the transfer and development of technology prepared in UNCTAD, and updates the seventh issue of the bibliography contained in TD/B/C.6/INF.2/Rev.6.

2. In order to facilitate reference, the entries in the bibliography have been classified into the following four subject areas, under which further sub-headings are also introduced (see table of contents):

I. General

II. The legal framework for the transfer of technology

III. Implications of technological change for international trade and development

IV. Issues relating to the strengthening of technological capacity of developing countries, including accelerating their technological transformation

V. Technical and operational assistance activities in the field of transfer and development of technology.

3. Underlining of all or part of the title has been used as a means of providing some indication of the focus of a given document. These underlinings, however, do not constitute part of the formal title of the document.

4. Certain documents, originally in mimeographed form, are reproduced in the Proceedings of the United Nations Conference on Trade and Development, or in Annexes or Supplements to the Official Records of the Trade and Development Board. Copies of the relevant volume of the Conference Proceedings, or of the Annexes or Supplements to the Official Records of the Trade and Development Board, may be ordered directly from the United Nations Publications, New York or Geneva, [2] quoting the sales number where indicated.
